

**March 2006:
Kenya & Mozambique Update**

Dear Friends

Just a quick Kenya and Mozambique Update!!

Phil Largent and I flew up to Kenya (14—20 March) with the specific goal of **setting up some ministry events** for the future. We specifically wanted to see how we could work amongst some of the **least reached people groups** in Kenya in the North West region.

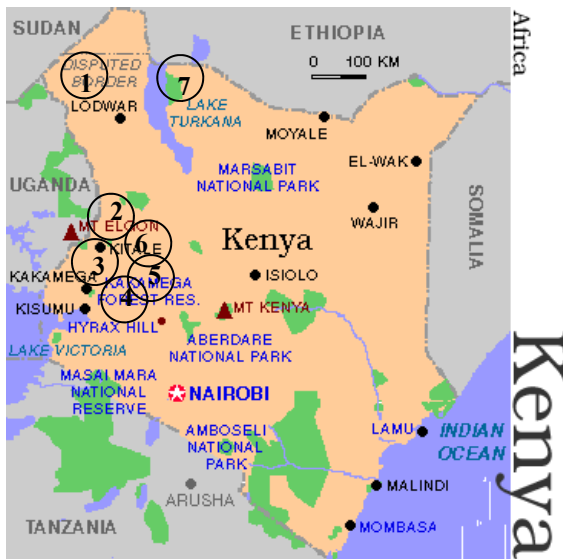

We met with 4 men, Pastors Isaiah Yalich, Samuel Lepaliani, Calist Nabruck and Eluid Psongoyo. We discussed the Train and Multiply® strategy at length with these men and shared also the Chronological Training. The abridged version of 'Firm Foundations' has already been translated into Swahili by Africa Outreach, under Frans Bens. The Train and Multiply® is almost halfway down the process of being translated, so we're in good shape for training to begin. Thank you Lucas, for your excellent work.

We've agreed that we will **begin in November** in 2 areas, **Mt Elgon and Lake Baringo**.

Please continue to pray for this process and our relationship with these key men. Communications is not that easy as they live in rural areas, but not impossible.

We also met with Ps. Daniel Chelagat who has set up meetings and conferences for us in the past and who is the one to thank for putting us in touch with these key men. We are deeply grateful to Pst. Daniel and his associate, Lucas Odero and we will be having a medical/playground outreach with him in November before we move to Mt Elgon and Lake Baringo area.

Please pray for the preparation of these events—
Thank you.

| 6. Chamus | Population: 19 000 - 0.02% Christian
Religion: Local Traditional
Language: Chamus/Swahili |
| Daasenech | Population: 35 000 - 0.02% Christian |

MOZAMBIQUE: 25—29 MARCH 2006

Our trip to Mozambique was different.

We took the Landover on it's maiden voyage after being fixed and are pleased to say that it did great! I forgot the Jesus Film DVD, but our Lord's providence had folks traveling up who could bring were "The Passion", which we showed twice. People were very quiet as they viewed the graphic portrayal of the Lord's suffering, death and resurrection.

A handful of people responded to the gospel. I believe the Holy Spirit will keep what was seen alive in the hearts of the people. Please continue to pray for this area. The fallow ground is not fully broken up and the people watch us closely.

Leaders in Training

We're preaching through 'Firm Foundations' (chronological training), when we go, trying to lay a foundation of understanding, not only in the community at large, but also in the hearts of the leaders we work with.

The churches are small and isolated from the community, not having much impact. Please pray that the men we train will rise up in boldness and that the love and life of Christ will be plainly seen in their lives.

We're preparing for an outreach from the 14—28th July, where a team from Kentucky will join hands with us and the Sabié game park group to put a roof on a local school that was blown off a few years ago. This practical demonstration of God's love will help break down barriers between us and the community as we preach the gospel.

Please also pray for all these preparations, our hearts and the hearts of the communities we work with.

We appreciate your love, prayers and support.
